the three gorges dam on the yangtze river in china is the largest hydroelectric dam in the world china's revered leader sun yat sen conceived of it in 1919 plans for its design and construction spanned several generations over the years it suffered many delays and setbacks it finally became a reality almost a century later the massive structure a true engineering marvel became fully operational in july 2012 since its inception the huge dam has attracted great praise and equally great criticism its supporters point to its benefits mainly flood control power production and improved navigation on the river detractors of the dam voice concerns over its negative effects on the ecology and environment both sides back their positions with convincing arguments only time will tell whether the dam's benefits will outweigh its liabilities in either case the three gorges dam stands tall on the river

recently the chinese government has decided with a minimum of fanfare to press ahead with one of the largest hydroelectric project ever built a dam across the yangtze river at the three gorges the dam aims to generate 17 500 mw of electricity will displace over 1 million people and will create a lake over 450 miles long

this dissertation assess the environmental and social sustainability of the three gorges dam project by ho ying chan 何穎珊 was obtained from the university of hong kong pokfulam hong kong and is being sold pursuant to creative commons attribution 3 0 hong kong license the content of this dissertation has not been altered in any way we have altered the formatting in order to facilitate the ease of printing and reading of the dissertation all rights not granted by the above license are retained by the author

abstract abstract of dissertation entitled assess the environmental and social sustainability of the three gorges dam project submitted by chan ho ying for the degree of master of arts at the university of hong kong in june 2004 the three gorges dam is the world largest hydroelectric project it is also an ambitious project that causes much concern on its impacts on the society and environment of the region this project would benefit in flood control hydropower generation water supply and navigation improvement but it may also bring huge effects in terms of social and environmental impacts this thesis is an attempt to examine and review the environmental and social sustainability of this dam project in examining the environmental sustainability the thesis focuses on the environmental risks or benefits of the project the impacts on climate water quality and wildlife have been studied the dam safety issue is also investigated as the water level will eventually rise to 175 meters the impacts on cultural and historical heritages are reviewed as well in evaluating the social sustainability of this project the current state of the resettlement project is investigated the resettlers living condition and the employment situation in the resettled areas are reviewed also the public participation and the legal protection of the resettlers have been studied after analyzing the environmental and social sustainability of the project it is found that the three gorges dam has the potential to

promote sustainable development but the environmental and social costs make it difficult therefore some alternatives are examined it includes constructing dam of the upper reaches nuclear power plants and dyke and channel improvement finally it is concluded with some recommendations that may help to avoid unsustainable development and the government should take efforts to assure the natural social and economic systems to interact in a harmonious way an abstract of exactly 267 words doi 10 5353 th b2980626 subjects dams environmental aspects china yangtze river gorges economic development projects social aspects china yangtze dams social aspects china yangtze river gorges economic development projects environmental aspects china yangtze river gorges migration internal china yangtze river gorges
