some of the earliest settlers in what is now maine noticed the abundance of lobsters along the coast a fairly well known tale in maine is that lobsters were once considered poverty food fit to be served only to prisoners and indentured servants who had traded a term of servitude for passage to the new world in massachusetts many servants rebelled beginning a trend where clauses were inserted into their contracts stating that they could not be forced to eat lobsters more than three times a week birkenmeier 2012 p 170 slowly this food for the poor became associated with wealth and status today the maine lobster is often considered a delicacy and a luxury item for which consumers usually pay a high price worth shelling out for

the global coronavirus pandemic is revealing major weaknesses inequities and system wide risks in global food systems giving renewed urgency to foster pathways to greater food system sustainability and resilience due to rising unemployment supply chain disruptions and other responses to the pandemic such as disruptions to social assistance programs in some countries predictions suggest a near doubling of food insecurity globally nutritional changes are also occurring as food availability and access changes leading to substitution of dry canned or processed foods for healthier fresh ingredients for some communities and the reverse for others these food security and nutritional changes are likely to be as impactful on human health as the virus itself as a system wide shock the pandemic reveals weaknesses of global supply chains the media highlighted empty supermarket shelves alongside food dumping in situations where producers locked into disappearing food service outlets were unable to access new markets farmers with long standing reliance on migrant agricultural labor that can no longer travel across international borders under lockdown struggle to access support for the upcoming harvest season the pandemic highlights well known inequities for marginalized food systems employees as essential workers are exposed to greater risks of contracting the virus in food processing agricultural and grocery store settings but have little choice in accepting these conditions in order to keep these low paying jobs the pandemic reinforces another well known food system inequity marginalized and impoverished minorities often suffer from diet related diseases i e cardiovascular diseases diabetes and or malnutrition that place them at greater risk of morbidity and mortality from the coronavirus lockdowns and border closures are reducing economic opportunities such as day labor and agricultural markets in some regions such as much of africa ensuing risks of food and nutrition insecurity for vast segments of the population threaten to set back development increase social conflict and catalyze migration finally the current pandemic shines a spotlight on the systemic risk of infectious diseases to emerge and become globalized through local bushmeat markets and international wildlife trade and how wildlife hunting and trade is influenced by land

use changes including by industrial agriculture at the same time adaptive responses to the coronavirus illustrate how more resilient and sustainable food systems could evolve going forward to avoid supply chain disruptions communities are increasing their reliance on local food systems including an increase in urban gardening and community supported agriculture programs small scale farmers are innovating to connect with buyers and with each other including through new online marketing initiatives entrepreneurs are identifying foods that would otherwise be wasted and directing them to food banks retailers and wholesalers are re configuring their distribution networks to shift food to where it is needed most food pantries local producers and food businesses are also collaborating with municipal governments to address food security gaps arising from covid 19 impacts
