this comprehensive and unique work considers the various aspects involved in the behaviour of bulk storage structures it is the accumulation of over 30 years of study experiments and field measurements by the author covering design examination and evaluation of bulk storage structures the subjects treated in this volume range from design through operational behaviour to failure and its prevention the following areas are considered theories of

stresses and strains in particulate materials material testing and evaluation for the prediction of a structure's loads and behaviour methods for calculating loads and safety assessment comparisons of field measurements with theoretical predictions effects of non ideal behaviour of stored materials use of silo related theories in geotechnical applications measuring strains deformations and pressure in operating structures and case histories of silo problems their causes and solutions this title is highly valuable in informing professional engineers and researchers working in the fields of design examination and evaluation of silos and bulk storage structures

objective of conference is to define knowledge and technologies needed to design and develop project processes and to produce high quality competitive environment and consumer friendly structures and constructed facilities this goal is clearly related to the development and re use of quality materials to excellence in construction management and to reliable measurement and testing methods

the book concentrates on powder flow properties their measurement and applications these topics are explained starting from the interactions between individual particles up to the design of silos a wide range of problems are discussed such as flow obstructions segregation and vibrations the goal is to provide a deeper understanding of the powder flow and to show practical solutions

the series of international symposiums on mining with backfill explores both the theoretical and practical aspects of the application of mine fill with many case studies from both underground and open pit mines minefill attendees and the proceedings book audience include mining practitioners engineering students operating and regulatory professionals consultants academics researchers and interested individuals and groups the papers presented at minefill symposiums regularly offer the novelties and most modern technical solutions in technology equipment and research in that way the papers submitted for the minefill symposia represent the highest quality and level in the conference domain for the 2020 2021 edition organizers hope that the papers presented in this publication will also be received with interest by readers around the world providing inspiration and valuable examples for industry and r d research
